

THE ONLINE DESTINATION FOR ALL THINGS BEAUTY

EVY Professional Hair Tools

So as you would expect, we were pretty excited when we knew we had the EVY Professional InfusaLite and iQ-OneGlide styling iron coming to us in the mail! We mean, who wouldn't be?

At the 2017 Hair Awards, EVY Professional secured two finalist nominations in the Most Innovative Styling Tool category. And guess what? The iQ-OneGlide took out the gong!

An Australian-owned brand, EVY PROFESSIONAL is a hair tool range featuring unique patented Japanese mineral technology. Each of the EVY products feature 32 natural negative ion-generating minerals. This unique blend of post volcanic minerals injects hydration and moisture into the hair as you style. The end result is hair heaven – silky, smooth, healthy hair every time.

The Beauty Bible team trialled the two products and this is what we thought:

INFUSALITE DRYER

The InfusaLite is a professional hairdryer designed with smart ion-generating mineral technology to infuse hair with moisture and hydration, with each blast leaving hair smoother and more hydrated.

The first thing we noticed with the InfusaLite was the weight of it. It is so light, which is super handy as we all know that slaving away in the bathroom with a heavy hairdryer for long periods of time can be a bit exhausting. Not with this one though. Weighing in at only 356 grams, it's so light you barely even notice you are holding it.

And, as the tagline says, it injects moisture and hydration into your hair which was evident from when we started using it. We saw the noticeable difference in the shine and smoothness straight away, so the results speak for themselves.

The EVY Professional InfusaLite dryer is a winner!

THE ONLINE DESTINATION FOR ALL THINGS BEAUTY

iQ-ONEGLIDE STYLER

Next, the 2017 AHFA winner itself. Like its sister product, the iQ-OneGlide Styler features ion-generating mineral technology to infuse hair with hydration and moisture, leaving it looking shiny and feeling healthy. Containing 32 minerals and 24-carat gold (yes, you read right) for smoother glide and deeper hydration, the 3-strip plate allows the iron to glide through hair without catching. And the extra features that make it even more of a winner? It features a digital temperature display, shuts off automatically after an hour and a metal ceramic heater for faster heating.

We all know that a straightener is a girl's best friend so we're not taking this review lightly, but we can say from the bottom of our beauty hearts that the iQ-OneGlide is up there as the best straightening tool we have ever used. It doesn't tug at hair and glides through effortlessly, and like the dryer we noticed the shine and smoothness in our hair improved, which is just bizarre as you are technically heating your hair!

We love this product and it's a stayer in the beauty cabinet. For \$299 it's absolutely worth it!
